PROJECT EXPERIENCE | Company data analysis

Viral to Value · Social App User Behavior Analysis Aug 2026 - Oct 2026

Data provided by social-app Company H · Codeit Sprint team project · Team Lead | SQL, Python

- To diagnose question repetition and post-completion behavior, built 23 analytical tables joining service data and event logs at user, school, question and visit levels.
- Analyzed 3,898 normalized question phrases across 10 schools; the top 10% accounted for 53.0% of generated or assigned records.
- Observed same-visit subsequent question starts in 3,162 of 149,038 completion visits (2.12%); proposed access to results and reactions.
- Translated findings into a service-redesign proposal and an AI-assisted demonstration prototype; coordinated team analysis, presented findings and handled Q&A.

Shared Office Trial-to-Paid Conversion Analysis Jul 2026

Data provided by shared-office Company J · Codeit Sprint team project · Team Lead | Python, Tableau

- To diagnose declining trial-to-paid conversion, compared stay duration and repeat visits and built D0/D1/D2 landmark models in a team study of 9,624 applicants and 6,026 visitors.
- Among single-branch users, the observed payment rate was 8.38 percentage points higher for repeat-date visitors than for one-day visitors.
- Integrated foot traffic, infrastructure and reviews within 1 km of branches to diagnose funnel bottlenecks; coordinated team tasks and Q&A.
- Identified stronger conversion signals after D1 behavior was included; helped propose a follow-up test of rebooking and post-visit rewards.

Subscription Education Conversion & Early Learning Behavior Analysis May 2026 - Jun 2026

Data provided by education Company C · Codeit Sprint team project · Analyst & Co-presenter | Python

- To examine how early learning relates to first payment, built first-seven-day user tables and lesson-entry/completion funnels.
- Compared first-week pre-payment completions with 30-day first payment; identified 7+ as an exploratory activation threshold.
- Defined four behavior segments; observed payment rates of 1.08% (inactive) and 10.98% (explorers) to inform onboarding.
- Prioritized beginner-content improvements, proposed first-content and next-lesson guidance tests, and co-presented findings.

PUBLICATIONS

Analysis of the Key Factors of Potholes Using Tree-Based Machine Learning Techniques Feb 2025

Jeehyeon Lee · Coauthor | Proceedings of the 2025 KICS Winter Conference, pp. 1015-1016. | Research project

- Processed SHP files in GIS for undergraduate capstone research; integrated road, traffic and weather data into 333,858 records with 37 variables.
- Compared XGBoost, LightGBM and CatBoost; LightGBM achieved pothole-class F1 0.81 in project evaluation after 1:1 undersampling.
- Reviewed thresholds with precision-recall curves, interpreted wind, traffic and bus-route feature importance, and led paper writing.

ADDITIONAL PROJECTS

- **Seoul Parcel Lockers** · GCS/BigQuery/dbt pipeline; 214 facilities; five-page Looker Studio dashboard. 2026
- **Membership Pricing A/B** · Welch/proportion tests on 2,500 practice users; revenue and refund-inquiry guardrails. 2026
- **Credit-Card Segmentation** · PCA/K-means: 8,950 users, five groups; stability checks and CRM proposals. 2026
- **Vehicle Sales Forecasting** · Direct vs. bottom-up exercise; 5.87% aggregate WAPE in the 2025 comparison. 2026
- **Seoul Subway Safety** · Team lead; analyzed five years of escalator/elevator accidents with facility and weather data. 2026
- **KidA Android App** · Programming GURU2 team project: SQLite database work and Kotlin app co-development. 2024
- **OTT Customer Research** · Analyzed 97 surveys, benchmarked competitors and proposed acquisition strategies. 2023
- **Voice Phishing Patterns** · Two-person capstone; crawled and cleaned 185 case files and video metadata. 2022 - 2023

EDUCATION AND TRAINING

Seoul Women's University · B.S. in Data Science Mar 2022 - Feb 2026

Codeit Sprint · Data Analytics Bootcamp, Cohort 15, completed Mar 2026 - Oct 2026

SKILLS

- **Analysis:** SQL, Python, pandas, Amplitude
- **Cloud & transformation:** GCP, Cloud Storage (GCS), BigQuery, dbt
- **Modeling:** Machine Learning, scikit-learn, Clustering, Time-series forecasting
- **Visualization & collaboration:** Tableau, Looker Studio, GitHub, Notion

CERTIFICATION

- **ADsP · Advanced Data Analytics Semi-Professional** · Korea Data Agency Sep 5, 2025

ADDITIONAL EXPERIENCE

H&M Starfield Suwon · Sales Advisor (Permanent) Oct 29, 2024 - Dec 20, 2025

H&M Times Square (Yeongdeungpo) · Sales Advisor (Contract) Aug 28, 2022 - Feb 11, 2023
